

Population Ageing: Odisha & its Districts

How demographic transition is affecting the Age Sex Structure of Odisha’s Population ?

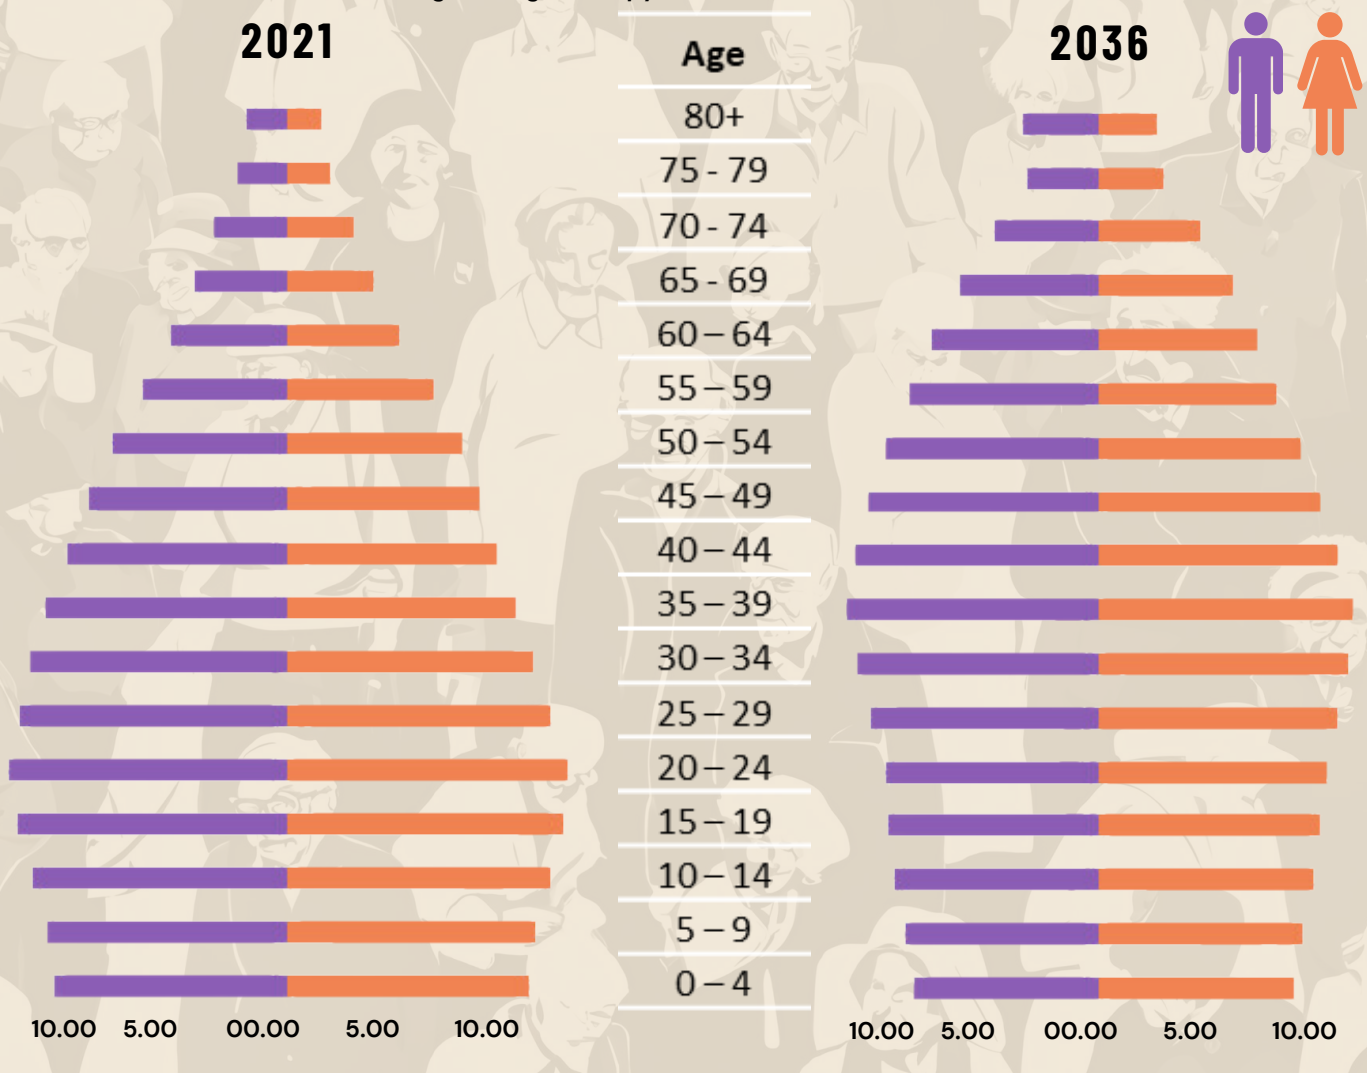

As lifespans increase and birthrates drop, a nation's population sees a bulge at both ends (young and old) with a thinner middle age group.

As the transition continues, child and youth population decrease while elderly population(aged 60+) increases

Demographic transition & ageing

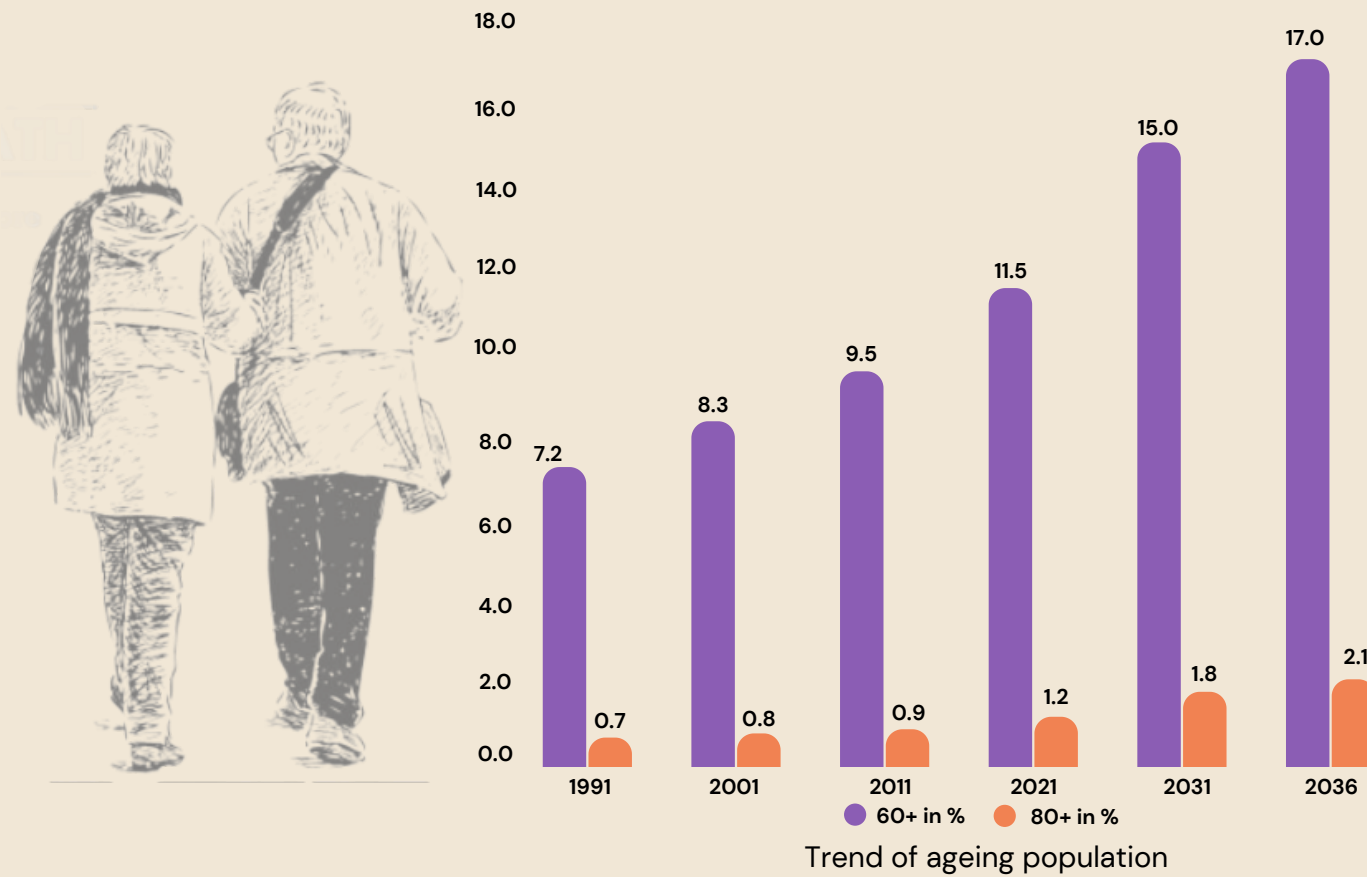

Figure 1: Age – Sex pyramid of Odisha, 2021 & 2036

Social Status

3 Main challenges of Ageing Population:

1.AGEING OF THE AGED

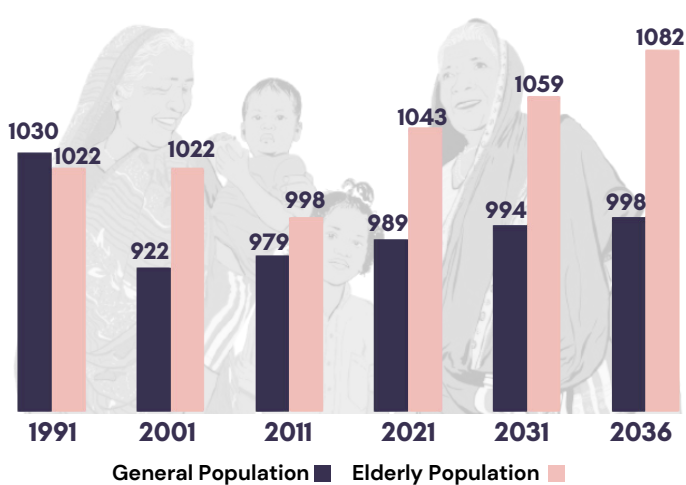

Highlights 1. Elderly population will increase from 5 million in 2021 to 8 million in 2036.

Highlights 2. 80+ population will increase by two times; from 0.5 million in 2021 to 1 million in 2036.

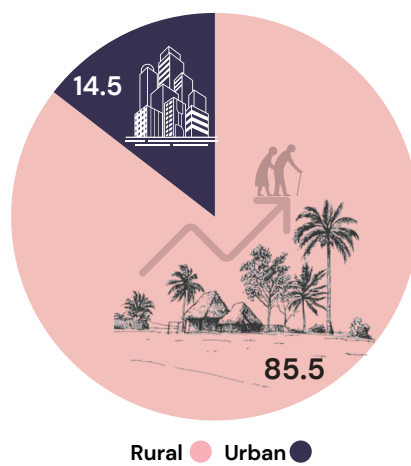

2.FEMINIZATION

Sex ratio of general and Elderly Population

Highlights : Feminization of ageing
More female population in elderly group, more vulnerable to social, economic and health domain.

3.RURALISATION

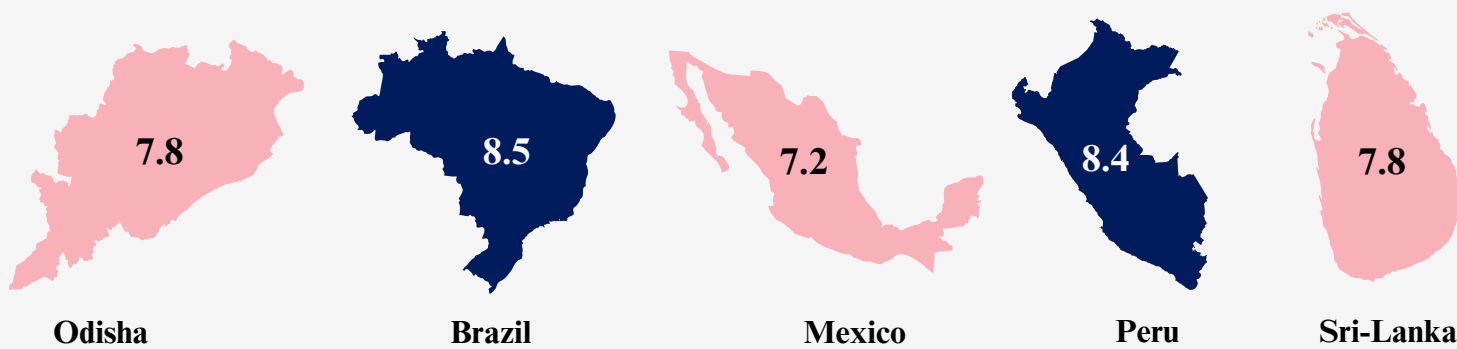

Ruralisation of Elderly, LASI 2017-18
